01 // CURRICULUM VITAE

Harikrishnan M

Senior Software Engineer / AI Researcher

Kerala, India
hari@immilearn.com

linkedin.com/in/harikrishnan-m-91a059122

I build the systems AI agents run on. Over eleven years I've gone from Android apps, to the embedded software and computer-vision models behind India's first autonomous store, to AgentBaba's agentic runtime, its AI-operable database, the agent harness behind its marketplace, and Avatar Studio's real-time avatar engine.

02 // EXPERIENCE

Senior Software Engineer / AI Researcher
Apr 2024 – Present

Immilearn India Pvt Ltd · Bengaluru, India

- **AgentBaba** (agentbaba.ai): backend and frontend engineer. Built the agentic runtime that runs AI workers autonomously, and AgentBaba's proprietary database, designed so AI can operate it directly.
- **Agent Marketplace**: frontend, backend and the harness every marketplace agent runs on, so people without a technical background can build their own agents.
- **Avatar Studio** (avatar.agentbaba.ai): frontend and backend. Built the proprietary avatar engine from R&D to production.

Mobile Application Developer
Jun 2023 – Apr 2024

Independent · Remote

- Built mobile applications for several companies.

AI/ML Engineer
Dec 2022 – Jun 2023

Stealth AI startup · Remote

- Payment collection for parking, tolls and petrol pumps, driven by cameras that identify number plates.
- Vehicle plate identification from camera feeds, and vehicle identity cross-matching on a proprietary stack. US patent pending.

Co-Founder · Technoloop
Jun 2020 – Dec 2022

- Co-founded a software services startup building mobile and web applications for clients.

Co-Founder · CrateHunt Esports
Aug 2019 – Jun 2020

Kollam, Kerala

- Two-person startup running online PUBG tournaments with cash prizes. Built and ran the MVP, then shut it down: the players were mostly teenagers with little to spend.

Systems Engineer / AI Researcher
Jun 2018 – Apr 2019

Oranz Technology Solutions, Kochi · Watasale, India's first autonomous store (later acquired by Amazon)

- Main developer of the embedded software that powered the store.
- Trained the AI models that detect each product and the shopper who picks it up or puts it back, so the right person is billed. Built their training and inference pipeline.

Asst. Systems Engineer & AI Researcher
Apr 2017 – May 2018

Oranz Technology Solutions, Kochi · Better Tomorrow Online

- Mobile applications for a fintech product. Part of the team that integrated AEPS (Aadhaar Enabled Payment System) for Federal Bank with NPCI.

Mobile Application Developer · Independent
Jan 2016 – Apr 2017

- Android apps for clients.

Junior Android Developer
Apr 2015 – Dec 2015

iROID Technologies · Kochi

- Native Android apps in Java.

03 // SKILLS

Agentic AI

Agent runtimes · Harness engineering · Tool use & actions · Multi-agent workflows · Agent memory & state

Machine learning & R&D

LLM applications · Product & person detection · Number plate recognition · Training & inference pipelines · Real-time avatar engines

Web & backend

FastAPI · Django · Next.js · React

Mobile

Flutter · Java / Android

Systems

Embedded software · IoT · Database design

Languages

Python · JavaScript / TypeScript · Dart · Java · C / C++

04 // LIVE PRODUCTS

AgentBaba
